

Transform your lighting

(X) Install Steps

Find a clean work area to install your adhesive light cover.

Flip over the fixture to remove screws.

Remove plastic panel from the fixture. Clean panel and make sure it is free of debris. Make sure the panel is completely dry before applying the light cover.

Peel back about 2" from adhesive light cover backing.

Line up the adhesive film on the plastic diffuser. Use the felt tip squeegee provided and slowly move from one end to the other removing all air bubbles.

Place diffuser back in fixture and reinstall all screws. Install fixture as directed by manufacturer. Enjoy your beautiful LED light cover.
